CERTIFIED MAIL

RCRA PERMITS SECTION

February 5, 1993

Ms. Carrie Sikorski - Chief Permits Section  
U.S. Environmental Protection Agency  
Region 10 - M/S HW-112  
1200 Sixth Avenue  
Seattle, WA. 98101

Dear Ms. Sikorski:

Enclosed are four (4) copies of Burlington Environmental's State of Washington Dangerous Waste Facility Certificate of Liability Insurance. These should replace the versions in Appendix I-4 in your copies of the Permit Applications for both the Pier 91 and Tacoma facilities. Please discard the old Certificate of Liability Insurance.

If you have any questions concerning these facilities, please let me know at (206) 654-8145.

Sincerely,

Julie A. Slocum  
Environmental Compliance Specialist

cc: Kerry Slattery - Ecology, Southwest Regional Office  
Doug Brown - Ecology, Hazardous Waste Permits Section  
Doug Hotchkiss - Port of Seattle

STATE OF WASHINGTON  
DANGEROUS WASTE FACILITY  
CERTIFICATE OF LIABILITY INSURANCE

1. National Union Fire Insurance Company (the "Insurer"), of 70 Pine Street, New York, NY 10270, hereby certifies that it has issued liability insurance covering bodily injury and property damage to Burlington Environmental, Inc. (the "Insured"), of 2203 Airport Way South, Seattle, Washington in connection with the Insured's obligation to demonstrate financial responsibility under 40 CFR 265.147 (for interim status) or WAC 173-303-620 (for final status). The coverage applies at:

EPA #WAD 000812909  
734 South Lucille St.  
Seattle, WA 98108

EPA #WAD 092300250  
625 SW 32nd  
Washougal, WA 98671

EPA #WAD 000812917  
2001 West Garfield (Pier 91)  
Seattle, WA 98119

EPA #WAD 020257945  
1701 Alexander St.  
Tacoma, WA 98421

EPA #WAD991281767  
20245 76th Ave. South  
Kent, WA 98032

for "sudden accidental occurrences." The limits of liability are \$2,000,000 each occurrence and \$2,000,000 annual aggregate, exclusive of legal defense costs for each location referenced above. The coverage is provided under policy number PLL 5290493 issue on December 31, 1992. The effective dates of said policy are December 31, 1992 through December 31, 1993.

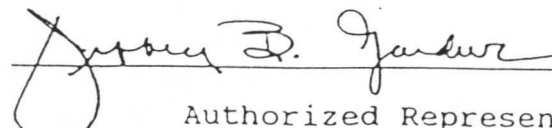

2. The Insurer further certifies the following with respect to the insurance described in Paragraph 1:
- (a) Bankruptcy or insolvency of the Insured shall not relieve the Insurer of its obligations under the policy.
  - (b) The Insurer is liable for the payments of amounts within any deductible applicable to the policy, with a right of reimbursement by the Insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of the deductible for which coverage is specified in 40 CFR 265.147 (for interim status), WAC 173-303-620 (for final status).

STATE OF WASHINGTON  
DANGEROUS WASTE FACILITY  
CERTIFICATE OF LIABILITY INSURANCE

- (c) Whenever requested by the Washington State Department of Ecology (WDOE), the Insurer agrees to furnish WDOE a signed duplicate original of the policy and all endorsements.
- (d) Cancellation of the insurance whether by the Insurer or the Insured, will only be effective upon written notice and only after expiration of sixty (60) days after a copy of such written notice is received by WDOE.
- (e) Any other termination of the insurance will be effective only upon written notice and only after the expiration of thirty (30) days after a copy of such written notice is received by WDOE.

I hereby certify that the wording of this instrument is, with the exception of changes required by the Washington State Department of Ecology to assure compliance with the financial requirements of WAC 173-303-400 and/or WAC 173-303-620 (10), identical to the wording specified in 40 CFR 264.151 (j) as such regulation was constituted on the date first above written, and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.

TABLE D1-6. SUMMARY OF OUTDOOR SECONDARY CONTAINMENT CALCULATIONS

Revised, April 1990, July 1990, August 1991

Sheet 1 of 1

ITEM DESCRIPTION	NORTH FIELD <sup>(1)</sup>	WEST FIELD <sup>(1)</sup>	ACID AREA	ALKALINE AREA	SOUTH FIELD
Max. no. of drums stored	2,248	1,398	120	126	540
10% of max. volume (gal)	12,364	7,689	660	693	2,970
25-yr/24-hr storm volume (gal)	29,501	26,343	1,017	1,119	7,030
Required secondary containment capacity (gal)	41,865	34,032	1,677	1,812	10,000
Compartment surface area (ft <sup>2</sup> )	17,220	15,601	480	528	3,317
Area taken up by drums, etc. (ft <sup>2</sup> )	2,779	1,934	143	148	616
Effective area (ft <sup>2</sup> )	14,441	13,667	337	380	2,701
Compartment depth (ft)	0.67	0.67	0.67	0.67	0.67
Sump capacity (gal)	90	90	45	45	45
Compartment capacity (gal)	72,092	68,240	1,728	1,940	13,519

(1) Calculations for North Field and West Field covered areas are included with the calculations for North Field and West Field outdoor storage because both the indoor and outdoor areas share common containment systems.

APPENDIX D-1

SECONDARY CONTAINMENT CALCULATIONS FOR CONTAINER STORAGE  
AREAS

Revised, June 1989, July 1990, August 1991

Sump capacity = 2 sumps @ 45 gal/sump = 90 gal  
Total containment capacity = (72,002 + 90) gal = 72,092 gal  
(Required capacity = 41,865 gal)

2. West Field

Calculations for the West Field include both indoor and outdoor storage because the containment system is shared by both.

Storage area - outdoor = 12,430 ft<sup>2</sup> / indoor = 3,171 ft<sup>2</sup>  
Total = 15,601 ft<sup>2</sup>

Storage capacity - outdoor = 822 drums / indoor 576 drums  
Total = 1,398 drums

25-year/24-hour rainfall event = 3.4 inches

Required capacity outdoors = 10% of volume + 25-year storm =  
(0.10) (822 drums) (55 gal/drum) +  
(3.4 in) (1 ft/12 in) (12,430 ft<sup>2</sup>) (7.48 gal/ft<sup>3</sup>) =  
4,521 gal + 26,343 gal = 30,864 gal

Required capacity indoors = 10% of volume of drums stored =  
(0.10) (576 drums) (55 gal/drum) = 3,168 gal

Total required capacity = 30,864 gal + 3,168 gal = 34,032 gal

Available capacity = effective storage area + sump capacities

Area taken up by drums on bottom = 622 drums

Surface area of drums = (3.14) (0.99 ft)<sup>2</sup> (622 drums) = 1,934 ft<sup>2</sup>

Effective area of storage compartment =  
15,601 - 1,934 = 13,667 ft<sup>2</sup>

Minimum containment depth = 8 inches

Storage compartment capacity = 13,667 ft<sup>2</sup> x (8/12) ft  
= 9,111 ft<sup>3</sup> x 7.48 gal/ft<sup>3</sup>  
= 68,150 gal

Sump capacity = 2 sumps @ 45 gal/sump = 90 gal

Total containment capacity = (68,150 + 90) gal = 68,240 gal  
(Required capacity = 34,032 gal)

3. Acid Container Storage: W-5 (120 drums stored)

Storage area = 480 ft<sup>2</sup>

Storage capacity = 120 drums

25-year/24-hour rainfall event = 3.4 inches

TABLE B6-1. BUFFER ZONES FOR TANKS CONTAINING IGNITABLE WASTE  
Revision, December 1990, September 1991

TANKS	MAX TANK CAPACITY (GAL)	<u>DISTANCE (1) FT.</u>		<u>DISTANCE (2) FT.</u>	
		REQUIRED	ACTUAL	REQUIRED	ACTUAL
2101	12,340	20	31	5	7
2102	12,340	20	40	5	16
2103	12,340	20	49	5	25
2104	12,340	20	44	5	16
2204	25,000	20	56	5	43
2301	14,810	20	80	5	56
2302	14,810	20	70	5	46
2303	5,118	15	63	5	39
2304	5,118	15	57	5	33
2305	2,606	15	50	5	26
2306	2,606	15	44	5	20
2307	14,810	20	78	5	54
2308	14,810	20	87	5	63
2309	14,810	20	96	5	72
2310	14,810	20	105	5	81
2313 (a)	14,810	10	195	2.5	28
2703 (a)	49,485	15	140	5	77
2706 (a)	49,485	15	84	5	38
2708 (a)	49,485	15	55	5	38
2709 (a)	55,940	25	60	7.5	36
2710 (a)	55,940	25	80	7.5	56

Distance (1): The minimum distance from the property line which is or can be built upon, including the opposite side of a public way.

Distance (2): The minimum distance from the nearest side of any public way or from the nearest important building on the same property.

Reference: Table 2-6, NFPA No. 30, lists the buffer zone distances based on tank capacity in gallons. The value obtained from Table 2-6 is applied to Table 2-1 of NFPA No. 30, operating pressures less than 2.5 psig.

(a) These tanks are protected by an approved foam system. Therefore, as specified in Table 2-1, required buffer zone distances for these tanks are half of the values given in Table 2-6.

Activated carbon is used for adsorption of organic contaminants because it is a very porous material with a large surface area-to-volume ratio. A typical activated carbon canister is a 55-gallon drum containing an activated carbon bed which rests on top of a gravel bed. The carbon bed will be tested periodically to determine effectiveness. If necessary, the unit will be regenerated. Under normal conditions, no pollutant loading should occur. The design for the activated carbon canisters is provided in Appendix D-3.

D1.7 Prevention of Reaction of Ignitable, Reactive,  
and Incompatible Wastes in Tanks

Revised, July 1990, December 1990, September 1991

40 CFR 270.16(f), 264.198 & 199

WAC 173-303-806(4)(c)(vi), 640(6) & (7), 395(a)

Ignitable wastes with a flashpoint of less than 100°F are accepted at the Pier 91 Facility for isolation storage as specified in Section C2.2, Identification of Wastes and Restricted Wastes. Reactive wastes are unacceptable at the facility.

Ignitable wastes with a flashpoint of 100°F or greater are accepted for storage and treatment in tanks.

Ignitable Wastes

Ignitable wastes (flashpoint  $\leq$  140°F) are accepted for storage and treatment in tanks 2101-2104, 2204, 2301-2310, 2313, 2703, 2706 and 2708-2710. Ignitable wastes are consolidated with compatible ignitable materials. This consolidation does not render the waste non-ignitable, but ignitable storage is protected from any material or conditions which may cause the waste to ignite and so

complies with WAC 173-303-640(6)(a)(ii). The waste is stored away from ignition sources in an open area as discussed in Section F5.1, Precautions to Prevent Ignition. "Danger-No Smoking, No Open Flames" signs are posted prominently in the dangerous waste storage area, and smoking is confined to specific areas away from storage and treatment areas.

Potential ignitable storage tanks are adequately located away from (a) a property line which is or can be built upon and (b) the nearest side of any public way or from the nearest public building or save property, as required by the National Fire Protection Association's buffer zone requirements for ignitable or reactive wastes (refer to Section B6.0). The minimum required distance from ignitable or reactive storage tanks to a property line, which is or can be built upon or to the opposite side of a public way, is 10 feet, and the minimum required distance to the nearest important building on site or to the near side of a public way is 2.5 feet. At the facility, the actual minimum distance from ignitable storage tanks to a property line is 28 ft and to the nearest important building or a public way is 7 ft (see Table B6-1, Buffer Zones For Tanks).

#### Incompatible Wastes

Wastes are tested for compatibility prior to consolidation in tanks, and incompatible wastes are not stored in the same tank. Waste incompatibility for all wastes is determined by the procedures described in Section C2.4.5, Analytical Test Methods. Waste profiles and check-in procedures are discussed in Section C2.6, Requirements for Incoming Wastes.

Before a tank can be used for a material which is incompatible with residue in the tank, the tank is cleared of all residual waste. Incompatible wastes or materials

D-3d(4)(c)	Potential for bottom heave or blow-out	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>

		<i>Provided (Y/N/N/A)</i>	<i>Technically Adequate (Y/N)</i>	<i>Technical Exhibit</i>	<i>Location in Application</i>
D-3d(4)(d)	Construction and operational loading	N/A			
D-3d(5)	Foundation installation procedures	N/A			
D-3d(6)	Foundation installation inspection program	N/A			
D-3e	Leachate collection and removal system	N/A			
D-3e(1)	System design and operation	N/A			
D-3e(2)	Chemical resistance	N/A			
D-3e(3)	Strength of materials	N/A			
D-3e(4)	Prevention of clogging	N/A			
D-3e(5)	Installation	N/A			
D-3e(6)	Maintenance	N/A			
D-3f	Plant growth	N/A			
D-3h	Run-on control system				
D-3h(1)	Calculation of peak flow	N/A			
D-3h(2)	Design and performance	N/A			

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
D-3h(3)	Construction	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3h(4)	Maintenance	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3i	Run-off control system				<u>          </u>
D-3i(1)	Calculation of peak flow	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3i(2)	Design and performance	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3i(3)	Construction	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3i(4)	Maintenance	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3j	Management of collection and holding units	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3k	Control of wind dispersal	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3l	+ Exemption based on design and operation				<u>          </u>
D-3l(1)	+ Double-lined waste pile	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3l(2)	+ Response to liquids in leak detection system	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3m	+ Exemption for inspection of liners				<u>          </u>
D-3m(1)	+ Inspections	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
D-3m(2)	+ Response to leaks and potential leaks	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>

+ Signifies an exemption from groundwater monitoring requirements that no longer is granted by the Federal government and is no longer in 40 CFR 261-280.

		<i>Provided</i> <u>(Y/N/N/A)</u>	<i>Technically</i> <i>Adequate</i> <u>(Y/N)</u>	<i>Technical</i> <i>Exhibit</i> <u></u>	<i>Location</i> <i>in</i> <u>Application</u>
D-3n	Treatment within the pile				
D-3n(1)	Treatment process description	<u>N/A</u>			
D-3n(a)	Equipment used	<u>N/A</u>			
D-3n(3)	Residuals description	<u>N/A</u>			
D-3o	Special waste management plan for piles containing wastes F020, F021, F022, F023, F026, and F027				
D-3o(1)	Waste description	<u>N/A</u>			
D-3o(2)	Soil description	<u>N/A</u>			
D-3o(3)	Mobilizing properties	<u>N/A</u>			
D-3o(4)	Additional management techniques	<u>N/A</u>			
D-3p	Prevention of reaction of ignitable, reactive, and incompatible wastes in waste piles				
D-3p(1)	Management of ignitable or reactive wastes placed in waste piles	<u>N/A</u>			
D-3p(2)	Management of incompatible wastes placed in waste piles	<u>N/A</u>			

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
D-4	Surface impoundments				
D-4a	List of wastes	<u>N/A</u>			
D-4b	Liner system exemption requests				
D-4b(1)	Exemption based on existing portion	<u>N/A</u>			
D-4b(2)	Exemption based on alternative design and location	<u>N/A</u>			
D-4b(3)	+ Exemption based on design and operation	<u>N/A</u>			
D-4b(3)(a)	+ Double-lined impoundment	<u>N/A</u>			
D-4b(3)(b)	+ Response to liquids in leak detection system	<u>N/A</u>			
D-4c	Liner system, general items				
D-4c(1)	Liner system description	<u>N/A</u>			
D-4c(2)	Liner system location relative to high water table	<u>N/A</u>			
D-4c(3)	Load on liner system	<u>N/A</u>			
D-4c(4)	Liner system, coverage	<u>N/A</u>			
D-4c(5)	Liner system exposure prevention	<u>N/A</u>			
D-4d	Liner system, foundation				

+ Signifies an exemption from groundwater monitoring requirements that no longer is granted by the Federal government and is no longer in 40 CFR 261-280.

		<i>Provided</i> <u>(Y/N/N/A)</u>	<i>Technically</i> <i>Adequate</i> <u>(Y/N)</u>	<i>Technical</i> <i>Exhibit</i> <u></u>	<i>Location</i> <i>in</i> <u>Application</u>
D-4d(1)	Foundation description	N/A

H. PERSONNEL TRAINING

[WAC 173-303-806(4)(a)(xii), 330]

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
H-1	Outline of the training program	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H2.0, H3.0</u>
H-1(a)	Job title/job description	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H7.0</u>
H-1(b)	Training content, frequency, and techniques	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H2.0, H3.0, H4.0</u>
H-1(c)	Training director	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H5.0</u>
H-1(d)	Relevance of training to job position	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H3.0</u>
H-1(e)	Training for emergency response	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H2.0, H3.0, H4.0</u>
H-2	Implementation of training program	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section H5.0</u>

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
I. CLOSURE AND POST-CLOSURE REQUIREMENTS [WAC 173-303-610 and 620]					
I-1	Closure plans				Section 11.0
I-1a	Closure performance standard				Section 11.2
I-1a(1)	Performance standard	Y			Section 11.2
I-1a(2)	Removal or decontamination standard	Y			Section 11.2
I-1b	Partial and final closure activities	Y			Section 11.5
I-1c	Maximum waste inventory	Y			Section 11.3
I-1d	Inventory removal, disposal or decontamination of equipment, structures, and soils	Y			Section 11.5.1, 11.5.2, 11.5.3
I-1d(1)	Closure of containers	Y			Section 11.5
I-1d(2)	Closure of tanks	Y			Section 11.5
I-1d(3)	Closure of waste piles	N/A			
I-1d(4)	Closure of surface impoundments	N/A			
I-1d(5)	Closure of incinerators	N/A			
I-1d(6)	Closure of land treatment units	N/A			
I-1d(6)(a)	Continuance of treatment	N/A			
I-1d(6)(b)	Vegetative cover	N/A			

		<u>Provided (Y/N/N/A)</u>	<u>Technically Adequate (Y/N)</u>	<u>Technical Exhibit</u>	<u>Location in Application</u>
I-1e	Closure of disposal units	N/A			
I-1e(1)	Disposal impoundments	N/A			
I-1e(1)(a)	Elimination of liquids	N/A			
I-1e(1)(b)	Waste stabilization	N/A			
I-1e(2)	Cover design	N/A			
I-1e(3)	Minimization of liquid migration	N/A			
I-1e(4)	Maintenance needs	N/A			
I-1e(5)	Drainage and erosion	N/A			
I-1e(6)	Settlement and subsidence	N/A			
I-1e(7)	Cover permeability	N/A			
I-1e(8)	Freeze/thaw effects	N/A			
I-1f	Schedule for closure	Y			Section I1.4
I-1g	Extensions for closure time	Y			Section I1.4
I-2	Post-closure plan	Y			Section I2.0
I-2a	Inspection plan	N/A			
I-2b	Monitoring plan	N/A			
I-2c	Maintenance plan	N/A			
I-2c(1)	Land Treatment	N/A			

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
I-3	Notice in deed	Y			Section I5.0
I-4	Closure cost estimate	Y			Section I3.0
I-5	Financial assurance mechanism for closure				Section I6.0
I-5a	Closure trust fund	Y			Appendix I-3
I-5b	Surety bond	N/A			
I-5b(1)	Surety bond guaranteeing payment into a closure fund	N/A			
I-5b(2)	Surety bond guaranteeing performance of closure	N/A			
I-5c	Closure letter of credit	N/A			
I-5d	Closure insurance	Y			Section I7.0, Appendix I-4
I-5e	Financial test and corporate guarantee for closure	N/A			
I-5f	Use of multiple financial mechanisms	N/A			
I-5g	Use of financial mechanism for multiple facilities	N/A			
I-6	Post-closure cost estimate	Y			Section I4.0

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
I-7	Financial assurance mechanism for post-closure care				Section I6.0
I-7a	Post-closure trust fund	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>
I-7b	Surety bond				<u>                                  </u>
I-7b(1)	Surety bond guaranteeing payment into a post-closure trust fund	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>
I-7b(2)	Surety bond guaranteeing performance of post-closure care	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>
I-7c	Post-closure letter of credit	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>
I-7d	Post-closure insurance	<u>Y</u>	<u>          </u>	<u>          </u>	Section I7.0
I-7e	Financial test and corporate guarantee for post-closure care	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>
I-7f	Use of multiple financial mechanisms	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>                                  </u>

I-8	Liability requirements				Section I7.0
I-8a	Coverage for sudden accidental occurrences				Section I7.0
I-8a(1)	Endorsement of certification	<u>Y</u>	<u>          </u>	<u>          </u>	Appendix I-4

		<u>Provided</u> <u>(Y/N/N/A)</u>	<u>Technically</u> <u>Adequate</u> <u>(Y/N)</u>	<u>Technical</u> <u>Exhibit</u>	<u>Location</u> <u>in</u> <u>Application</u>
I-8a(2)	Financial test for liability coverage	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
I-8a(3)	Use of multiple insurance mechanisms	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
I-8b	Coverage for nonsudden accidental occurrences	<u>Y</u>	<u>          </u>	<u>          </u>	<u>Section I7.0</u>
I-8b(1)	Endorsement of certification	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
I-8b(2)	Financial test for liability coverage	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
I-8b(3)	Use of multiple insurance mechanisms	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
I-8c	Request for variance	<u>N/A</u>	<u>          </u>	<u>          </u>	<u>          </u>
J.	OTHER FEDERAL AND STATE LAWS	<u>Y</u>			<u>Section J</u>
K.	PART B CERTIFICATION	<u>Y</u>			<u>Section K</u>

APPENDIX A  
COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
270.14(b)(5)		INSPECTIONS				
	264.195(a)	-- Schedule and procedure for overfill controls inspection	<u>Y</u>	<u>  </u>	<u>Section F</u>	<u>  </u>
	264.195(b)(1)	-- Daily inspection of aboveground portions of tank system	<u>Y</u>	<u>  </u>	<u>F2.2.2</u>	<u>  </u>
	264.195(b)(2)	-- Daily inspection of monitoring and leak-detection data	<u>Y</u>	<u>  </u>	<u>F2.2.2</u>	<u>  </u>
	264.195(b)(3)	-- Daily inspection of construction materials, local area, and secondary containment system for signs of erosion or releases	<u>Y</u>	<u>  </u>	<u>F2.2.2</u>	<u>  </u>
	264.195(c)(1)	-- Confirm proper operation of the cathodic protection system within six months of initial installation	<u>Y</u>	<u>  </u>	<u>F2.2.2</u>	<u>  </u>
		-- Inspect cathodic protection system operation annually thereafter	<u>  </u>	<u>N/A</u>	<u>  </u>	<u>  </u>
	264.195(c)(2)	-- Bimonthly inspection of all sources of impressed current	<u>  </u>	<u>N/A</u>	<u>  </u>	<u>  </u>
			<u>  </u>	<u>N/A</u>	<u>  </u>	<u>  </u>
270.14(b)(7)		CONTINGENCY PLAN PROCEDURES				
	264.196	-- Spill and/or leakage response measures including:				
		-- Immediate removal from service	<u>Y</u>	<u>  </u>	<u>G4.3</u>	<u>  </u>
	264.196(a)	-- Cessation of use; prevent flow or addition of wastes	<u>Y</u>	<u>  </u>	<u>G4.3</u>	<u>  </u>
	264.196(b)	-- Removal of waste from tank system or secondary containment system	<u>Y</u>	<u>  </u>	<u>G4.3</u>	<u>  </u>
	264.196(c)	-- Containment of visible releases to the environment	<u>Y</u>	<u>  </u>	<u>G4.3</u>	<u>  </u>
	264.196(d)	-- Notification, reports of any releases	<u>Y</u>	<u>  </u>	<u>G4.2</u>	<u>  </u>
		-- Notification to Regional Administrator of a release within 24 hours	<u>Y</u>	<u>  </u>	<u>G9.0</u>	<u>  </u>
		-- Report to Regional Administrator of a release within 30 days of the following information:		<u>N/A</u>	<u>  </u>	<u>  </u>
		-- Likely route of migration of the release		<u>N/A</u>	<u>  </u>	<u>  </u>
		-- Characteristics of the surrounding soil		<u>N/A</u>	<u>  </u>	<u>  </u>

## COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
		-- Results of monitoring/sampling	_____	N/A	_____	_____
		-- Proximity to downgradient drinking water, surface water and population areas	_____	N/A	_____	_____
		-- Description of response actions taken or planned	_____	N/A	_____	_____
	264.196(e)	-- Provision of secondary containment, repair, or closure	Y	_____	G4.3	_____
	264.196(f)	-- Certification of major repairs by independent, qualified, registered, professional engineer	_____	N/A	_____	_____
270.14(b)(13)		CLOSURE, POST-CLOSURE CARE & FINANCIAL RESPONSIBILITY	_____	_____	_____	_____
		TANKS WITH SECONDARY CONTAINMENT	_____	_____	_____	_____
	264.197(a)	-- Decontamination/Removal procedures during closure for tank systems that can be practicably decontaminated	Y	_____	11.5	_____
	264.197(b)	-- Closure and post-closure care and financial assurance requirements that apply to landfills for tanks that cannot be practicably decontaminated	Y	_____	16.0	_____
		TANKS WITH SECONDARY CONTAINMENT	_____	_____	_____	_____
	264.197(c)	-- Closure Plan for practicable decontamination/removal of hazardous releases	Y	_____	11.5	_____
		-- If decontamination/removal of hazardous waste is not practicable	_____	N/A	_____	_____
		-- Contingent closure plan in accordance with landfill requirements	_____	N/A	_____	_____
		-- Contingent post-closure plan in accordance with landfill requirements	_____	N/A	_____	_____
		-- Cost estimate for contingent closure plan in accordance with landfill requirements	_____	N/A	_____	_____
		-- Cost estimate for contingent post-closure plan in accordance with landfill requirements	_____	N/A	_____	_____
		-- Financial assurance for compliance with contingent closure and post-closure plan	_____	N/A	_____	_____

## COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
270.16(a)		WRITTEN ASSESSMENT OF TANK SYSTEM STRUCTURAL INTEGRITY AND SUITABILITY FOR HANDLING HAZARDOUS WASTE	Y		D1.0	
	264.191(a)	EXISTING TANK SYSTEMS				
	264.191(b)(1)	-- Existing tank system design standards		N/A		
	264.191(b)(2)	-- Hazardous characteristics of the waste		N/A		
	264.191(b)(3)	-- Existing corrosion protection measures		N/A		
	264.191(b)(4)	-- Documented or estimated age of the tank system		N/A		
	264.191(b)(5)	-- Results of a leak test, internal inspection or other tank integrity examination in accordance with Sec. 264.191(b)(5)(i) and (ii)		N/A		
	264.192(a)	NEW TANK SYSTEMS	Y		D1.1	
	264.192(a)(1)	-- New tank system design standards	Y		D1.1	
	264.192(a)(2)	-- Hazardous characteristics of the waste		N/A		
	264.192(a)(4)	-- Protection from vehicular traffic for underground tank system components		N/A		
	264.192(a)(5)	-- Full-tank considerations (foundation considerations for a full tank)	Y		D1.2.1	
		-- Anchoring	Y		D1.1	
		-- Saturated zone location		N/A		
		-- Seismic fault zone location		N/A		
		-- Frost-heave considerations		N/A

270.16(c)		DESCRIPTION OF TANK AUXILIARY SYSTEMS	Y		D1.4	
		-- Feed system(s)	Y		D1.4	
		-- Safety cutoff and/or bypass systems	Y		D1.4	
		-- Process flow	Y		D1.4	
270.16(d)		DIAGRAM OF PIPING, INSTRUMENTATION, AND PROCESS FLOW	Y		D1.4	

## COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
270.16(e)	264.192(3)	EXTERNAL CORROSION PROTECTION MATERIALS AND EQUIPMENT FOR METAL TANKS OR EXTERNAL METAL COMPONENTS	Y		D1.3	
		NEW TANK SYSTEMS				
	264.192(3)(i)	-- Corrosion potential assessment			D1.3	
	264.192(3)(ii)	-- Corrosion protection assessment			D1.3	
270.16(f)		NEW TANK SYSTEM INSTALLATION		N/A		
	264.192(b)	-- Documentation for New Tank System Installation Procedures		N/A		
	264.192(c)	-- Backfill		N/A		
		-- Material		N/A		
		-- Placement		N/A		
	264.192(d)	-- Tightness Testing		N/A		
		-- Tanks		N/A		
		-- Piping		N/A		
		-- Repairs		N/A		
	264.192(e)	-- Ancillary equipment support and protection		N/A		
	264.192(f)	-- Corrosion expert supervises proper installation of field-fabricated corrosion protection		N/A		
	264.192(g)	-- Written certifications		N/A		
270.16(g)		SECONDARY CONTAINMENT	Y		D1.2	
	264.193(b)	-- Characteristic properties including:	Y		D1.2	
		-- Prevention of waste or accumulated liquid migration	Y		D1.2	
		-- Detection and collection of released waste and accumulated liquid until the collected material is removed	Y		D1.2.2	
	264.193(c)	-- Design parameters including:			D1.2.1	
		-- Compatibility with contained waste and sufficient strength	Y		D1.2.1	
		-- Adequate foundation or base	Y		D1.2.1	
		-- Having a leak-detection system that promptly detects releases into containment area	Y		D1.2.2	

# COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
		-- Ability to drain and remove any accumulated liquid in containment area	<u>Y</u>		<u>D1.2.2</u>	
264.193(e)		-- Additional requirements including:	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
		-- Liners and vaults must have capacity to hold 100% of the design capacity of the largest tank within the containment area	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
		-- Liners and vaults must be designed to prevent run-on and infiltration of precipitation into containment area, unless the area has sufficient capacity to hold precipitation from a 25-year, 24-hour rainfall event	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
		-- Liner must be free of cracks and gaps and able to cover all surrounding earth likely to come in contact with released waste	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
		-- Vault (concrete) constructed as a continuous structure with chemical resistant water stops at all joints; has an interior coating compatible with stored waste; has an exterior moisture barrier to prevent migration of moisture into the vault; and, provided with equipment to protect against the formation and ignition of explosive vapors if the stored waste meets the definition of ignitable waste	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
		-- Double-walled tanks must be an integral structure; protected, if metal, from internal and external corrosion; and, provided with a continuous leak-detection system	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
264.193(f)		-- Secondary containment requirements for applicable ancillary equipment	<u>      </u>	<u>N/A</u>	<u>      </u>	<u>      </u>
			<u>      </u>	<u>      </u>	<u>      </u>	<u>      </u>

# COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
270.16(h)	264.193(g)	TANK SYSTEMS FOR WHICH VARIANCE FROM SECONDARY CONTAINMENT IS SOUGHT		N/A		
		-- Based on a demonstration of equivalent protection of ground water and surface water		N/A		
		-- Nature and quantity of the wastes		N/A		
		-- Proposed alternate design and operation		N/A		
		-- Hydrogeologic setting of the facility		N/A		
		-- Any other factors that would influence the quality and mobility of hazardous constituents and their potential to migrate		N/A		
		-- Based on a demonstration of no substantial present or potential hazard		N/A		
		-- Potential adverse effects on ground water, surface water and land quality (general)		N/A		
		-- Physical and chemical characteristics of the waste		N/A		
		-- Hydrogeological characteristics of the facility		N/A		
		-- Potential for health risks caused by human exposure to waste constituents		N/A		
		-- Potential for damage to wildlife, crops, vegetation and physical structures caused by exposure to waste constituents		N/A		
		-- Persistence and permanence of potential adverse effects		N/A		
		-- For specific potential effects on ground water quality, information must be included on:		N/A		
		-- Quantity and quality of ground water and ground water flow direction		N/A		
		-- Proximity and withdrawal rates of ground-water users		N/A		
		-- Current and future uses of ground water in the area		N/A		
		-- Existing quality of ground water		N/A		

## APPENDIX A (Continued)

## COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
		-- For specific potential adverse effects on surface water	_____	N/A	_____	_____
		-- Quantity and quality of surface water and the direction of surface-water flow	_____	N/A	_____	_____
		-- Patterns of rainfall in the region	_____	N/A	_____	_____
		-- Proximity of tank system to surface waters	_____	N/A	_____	_____
		-- Current and future uses of surface waters	_____	N/A	_____	_____
		-- Existing quality of surface water	_____	N/A	_____	_____
		-- For specific potential adverse effects on the surrounding land	_____	N/A	_____	_____
		-- Patterns of rainfall	_____	N/A	_____	_____
		-- Current and future uses of the surrounding land	_____	N/A	_____	_____
	264.193(g)(3)	-- For tank systems where a variance has been granted and a release occurs from the primary tank system	_____	N/A	_____	_____
	264.193(h)	-- Request for Variance Procedures	_____	N/A	_____	_____
		-- Notification of Regional Administrator in writing	_____	N/A	_____	_____
		-- <u>Existing tank systems</u> --at least 24 months prior to date secondary containment must be provided	_____	N/A	_____	_____
		-- <u>New tank systems</u> --at least 30 days prior to entering into a contract for installation	_____	N/A	_____	_____

COMPLETENESS CHECKLIST

Part 270	Part 264	Subject Requirement	Provided	N/A	Location in Application	Comments
270.16(j)	264.199	SPECIAL REQUIREMENTS FOR INCOMPATIBLE WASTES INCLUDING:				
		-- Incompatible wastes must not be placed in a tank, unless Sec. 264.17(b) is complied with	<u>Y</u>	<u>  </u>	<u>D1.7</u>	<u>  </u>
		-- Hazardous waste must not be placed in a tank system that has not been decontaminated and that previously held incompatible waste or material, unless Sec. 264.17(b) is complied with	<u>Y</u>	<u>  </u>	<u>D1.7</u>	<u>  </u>
			<u>Y</u>	<u>  </u>	<u>D1.7</u>	<u>  </u>

Section A

is not capable of properly managing the waste due to existing operational constraints and permit limitations; (2) There are unreconcilable significant discrepancies between the shipment and the wastes listed on the manifest or shipping paper; (3) The shipment has arrived in a condition which Chemical Processors, Inc. believes presents an unreasonable hazard to facility personnel or facility operations.

If a dangerous waste shipment cannot be properly managed at the facility and is in a condition where it can safely be transported elsewhere, the Plant Manager, Plant Supervisor, or Foreman will contact and notify the generator that their shipment has been rejected. The generator is asked if the shipment should be returned to them, to the alternate facility designated on the manifest, or to another facility capable of handling the waste.

If a damaged or leaking shipment is denied receipt at the facility, the load will be rendered safe for further transport to an alternate authorized facility.

Procedures for the receipt of damaged or leaking shipments are discussed in Section B8.4, Activation of Contingency Plan for Damaged Shipments.

#### B8.4 Activation of Contingency Plan for Damaged Shipments

Revised, January 1990

WAC 173-303-350(3)(b), 370(5)(c)

Should a shipment of dangerous waste arrive at the facility which cannot be safely transported back to the generator or to the alternate storage/treatment facility because the shipment is damaged or leaking and would pose a risk to the

public health or the environment, the following steps will be taken.

Examine the load and manifest or shipping paper to determine if the leak can be stopped readily with reasonable effort, time and supplies. Attempt to contain spills or run off by use of absorbent materials and diking. Immediately notify the Emergency Coordinator of the situation. Call in contractor clean-up/control assistance if needed.

If the load cannot be rendered safe, the Contingency Plan will be activated. The Emergency Coordinator in consultation with the Regulatory Affairs Department will contact the appropriate local, state and federal agencies. The generator of the waste shipment involved will also be contacted.

Prior to further transportation, the damaged load will be rendered safe, all leaks controlled and repaired and the load will be returned to a condition where it no longer poses a threat to public health or the environment. The load will then be shipped from the Pier 91 Facility as directed by the generator of the dangerous waste in question.
